

Rail Profile Grinders are used for de-burring, re-profiling of rails after welding. Our machine is highly efficient and designed for all types of rail sections and switches. Its powerful engine ensures higher material removal. Low maintenance, fast and easy to operate. This machine is ideal choice for rail profile grinding.

TECHNICAL SPECIFICATION

Power	2.2 kW
Cutting Speed	5600 RPM
Wheel type	Cup shaped
Generator Specs.	2.8 KVA (Fuel: Petrol & oil)
Weight	≥25 Kg

Grinder

Power	2200 Watts
No. Load Speed	5600 RPM
Approx. Net Weight	11.6 kg.

Rail Grinding Wheel

Wheel Shape	Cup Shaped
Size of Wheel	150/120 X 50 X 22.23 mm
