

Battery Operated Rail Drilling Machine is used for drilling holes in all section of rails using core drill bit. It has Robust construction & low maintenance cost.

Fixing and Drilling holes in 60kg 90UTS rail section in less than a 1 minute. With full charged battery it can drill more than 100 nos. with 28 mm or 32mm for 60 kg 90UTS rail section.

TECHNICAL SPECIFICATION

Electric Motor	48VDC, Brushless DC motor
Motor power	1200 W, 4000 RPM
Speed of main shaft	Variable Speed: 250 RPM to 450 RPM/ Single Speed :300 RPM
Bore hole diameter	Φ16 to Φ38 mm
Drill Bit size	Φ16 to Φ38 mm
Drilling time	≤40s
Weight	21kg (with Battery)
