

Battery Operated Track Machines

Battery Operated Impact Wrench

The lithium battery bolt wrench machine is mainly used to easily open the jammed/rusted nuts of Fish Bolts and other bolts in plain track, Turn outs, Dead End Siding etc. Highly compact design with higher torque and 3 mode automatic stop for both forward and reverse rotation mode. Its trigger switch with full speed mode allows less hand and finger fatigue.

TECHNICAL SPECIFICATION

Power	40 V Lithium battery
Max. Fastening Torque	1800 NM
Bolt (Nut) specs	M12-M36
Number of impacts	2200 times/min
Square Drive	19 mm
Weight	4.2 Kg.
